

Key Indicator - 7.3 Institutional Distinctiveness

7.3.1 Portray the performance of the Institution in one area distinctive to its priority and thrust within 1000 words

- The covid 19 pandemic has triggered new ways of learning. One of the most often used terms after the pandemic is the new normal. It increased the use of online learning tools.
- Zoom app, Google meet, Google classroom, YouTube, Team viewer, Microsoft teams were used in the online platforms.
- Periodical online meeting was conducted to monitor and encourage the teaching-learning process among the students.
- Online education enabled the teacher and the student to set their own learning tale and there's additional flexibility of setting a schedule that fits everyone agenda.
- As a result using an online educational platform allowed for a better balance of work and studies, so there is no need to give anything up.
- Online education allowed students to attend classes from any location of their choice and there is no chance for missing the lessons. Online lectures were recorded, archived and shared for future reference. This allowed students to access the learning material at the time of their comfort. This was assessed by online internal assessment test.
- Online learning reduced financial cost. It is far more affordable as compared to physical learning. Online learning eliminated the cost points of student transportation and meals
- Every student has a different learning journey and a different learning style. Some students are visual learners, while some students prefer to learn through audio. The online learning system with its range of options and resources was personalized in many ways. It is the best way to create a perfect learning environment suited to the needs of each student.
